Work plans 2015

Following approval of the proposed GSSP (Devuyst *et al.*, 2003) at Pengchong in southern China, by the SCCS in late 2007 and its ratification by the ICS and IUGS, task-group member François-Xavier Devuyst had been preparing the final report about the Tournaisian-Viséan boundary GSSP but the task-group chairman George Sevastopulo has taken over that role. In the November 1st 2014 - October 31st fiscal year, the task group plans to continue with preparation of the final manuscript for the project. George Sevastopulo, the task group chairman, is leading that work and plans to have the report finished in late 2015.
